

Chemical Peel Consent (including VI Peel)

Parlor Beauty & Wellness Collective | 6100 E Central Ave, Suite 215, Wichita, KS 67208 | (316) 201-6255

Consent for professional chemical peel treatment. Peels remove damaged surface skin to improve pigment, texture, acne, and clarity. Visible peeling typically occurs over 3-7 days.

What to Know

- ☐ Expect redness, tightness, and visible peeling for several days; deeper peels peel more.
- ☐ Temporary darkening of pigment can occur before it improves; rarely, pigment changes can persist.
- ☐ Cold-sore reactivation is possible; tell us about any history of cold sores.
- ☐ Picking or peeling the skin by hand can scar; skin must shed on its own.
- ☐ Strict sun avoidance and SPF are required during healing.

I Confirm That

- ☐ I have not used Accutane in the past 6 months, and I have disclosed retinoid use.
- ☐ I have no active infection or open skin in the treatment area.
- ☐ I understand peeling is expected and I will not pick, scrub, or peel the skin by hand.
- ☐ I will use sun protection every day during healing.

For your safety, tell us about all medications and supplements (including aspirin, ibuprofen, fish oil, antibiotics, and retinoids), skin conditions, allergies, recent or planned sun or tanning-bed exposure, self-tanner use, pregnancy or nursing, and recent cosmetic procedures. Undisclosed conditions and medications are the most common cause of poor outcomes.

Results vary with skin type, age, hormones, health, home care, and consistency with the treatment plan. Honest work is promised; specific outcomes are not guaranteed.

I have read this form, had the chance to ask questions, and I answered the health questions truthfully. I understand the information above and consent to the service described.
