

IPL Photo Rejuvenation Consent (Venus Versa)

Parlor Beauty & Wellness Collective | 6100 E Central Ave, Suite 215, Wichita, KS 67208 | (316) 201-6255

Consent for intense pulsed light (IPL) photo rejuvenation, a light-based treatment for visible redness, sun damage, and uneven pigment.

What to Know

- ☐ Treated pigment often darkens first, then flakes away over roughly a week; redness is normal for a day or two.
- ☐ Blistering, burns, and pigment change are possible; risk rises with recent sun, tanning, or photosensitizing medication.
- ☐ IPL candidacy depends on skin tone and is confirmed at consultation.
- ☐ A series of treatments is commonly needed, with maintenance over time.

I Confirm That

- ☐ I have had no sun or tanning exposure on the area for 2 weeks and will protect it for 2 weeks after.
- ☐ I have disclosed all medications, including antibiotics and retinoids.
- ☐ I have no active cold sores, infection, or open skin in the area.

For your safety, tell us about all medications and supplements (including aspirin, ibuprofen, fish oil, antibiotics, and retinoids), skin conditions, allergies, recent or planned sun or tanning-bed exposure, self-tanner use, pregnancy or nursing, and recent cosmetic procedures. Undisclosed conditions and medications are the most common cause of poor outcomes.

Results vary with skin type, age, hormones, health, home care, and consistency with the treatment plan. Honest work is promised; specific outcomes are not guaranteed.

I have read this form, had the chance to ask questions, and I answered the health questions truthfully. I understand the information above and consent to the service described.
